

Welcome to the fifth newsletter of Planet Goals Project!

As Planet Goals enters its final implementation phase, our work is moving from the development of educational resources to their practical use, testing and dissemination. Over the coming months, the consortium will focus on bringing the project's learning materials directly to the VET community through the multilingual platform, practical workshops, piloting activities and events across Europe.

WHAT IS HAPPENING NOW?

While the **WP3 Handbook for Educators** is being piloted across all partner countries, the consortium is also progressing with the development of **WP4 – Platform-based Workshops**.

The feedback gathered from the handbook pilots will contribute to the project's broader process of continuous testing, adaptation and improvement, helping ensure that the Planet Goals educational resources remain relevant, accessible and useful for VET professionals and learners.

At the same time, partners are working on the multilingual Workshop Manual, which will support VET educators and professionals in using the Planet Goals platform and conducting the workshops effectively. The manual will be made available in all partner languages.

HIGHLIGHT: 2ND WEBINAR

SECOND PLANET GOALS WEBINAR SUCCESSFULLY COMPLETED

On 11 June 2026, the Planet Goals consortium successfully organised its second online webinar, bringing together 34 participants from different countries.

The webinar provided an opportunity to present the latest developments of the project, share information about the educational resources being developed, and engage participants in the topics of the Sustainable Development Goals and vocational education and training.

The strong international participation helped further expand the reach of Planet Goals and strengthen awareness of the project among educators, professionals and other interested stakeholders.

WHAT'S NEXT?

The next stage will focus on the **technical and visual adaptation of the workshop materials** and their integration into the **RWD educational platform**. The final WP4 resources will include seven interactive workshops covering the Sustainable Development Goals, combining educational content with quizzes and interactive tasks.

Once integrated into the platform, the workshops will be piloted in every partner country, with at least 30 participants per country and 210 participants in total. The results of these pilots will provide further feedback for improving the platform and finalising the project's educational tools.

UPCOMING ACTIVITY

In **January 2027**, the partners will meet in Sandefjord, Norway, for a **three-day transnational project meeting**. The meeting will provide an opportunity to review the project's achievements and coordinate the remaining activities.

Stay tuned for even more updates coming soon!
And don't forget to check out our website and social media!
